

SealGreen Efflorescence Remover

Size	Makes	Covers
Pint	2.5 Quarts	75 – 100 sqft
Quart	1 Gallon	150-0200 sqft
4 Gallons	16 Gallons	3,000 – 4,000 sqft
55 Gallons	220 Gallons	33,000 – 44,000 sqft

Application –

- Apply with a garden pump sprayer. Allow it to remain for 5 minutes and then rinse with a pressure washer.
- Cleaning efflorescence is an ongoing solution, not a cure. Sealing a surface might be a solution, but if water finds its way into the surface, you could end up with spalling which is a destructive process that should be avoided.
- This product is ideal for temperatures from 45 degrees to 90 degrees F for removing calcium carbonate and magnesium carbonate.
